

FIRST AUTHENTIC PHOTOGRAPHS OF THE NEW FORD CAR

The six body models and chassis of the new Ford car are shown above. The new car has graceful, distinctive lines, exceptional power, unusual speed and getaway. It has been driven at more than sixty miles per hour; accelerates from 5 to 25 miles per hour in 8½ seconds; in high gear; travels 40 miles per hour in second gear; is fitted with three-speed transmission of Lincoln

design and is completely equipped. Each model is offered in a number of bright optional color combinations. No. 1 is the new Tudor; 2, the new Phaeton; 3, front view of the new Tudor; 4, the new Chassis; 5, rear view of the Phaeton; 6, the new Sport Roadster; 7, the new Sport Coupe; 8, the new Ford Sedan; 9, the new Coupe.

ADVICE FROM A RED CROSS NURSE

"Winter Colds and How To Cure Them."

A cold is not a recognized cause of death, yet it is in danger of soaring to the highest place among causes of death, carried further by the recognized dangerous diseases. Colds are usually very contagious, the infection being spread by drops of mucus sprayed into the air through coughing, sneezing or speaking. Contact with persons who have had colds must be avoided; and when the children cough and sneeze, and are running noses, then Mother must keep them at home until

cured. Inflamed tonsils, adenoids and nasal growths are all predisposing factors in colds, as they act as centres of infection. It is desirable to have them attended to at once.

Do not over-heat your house. Keep it around 65 degrees Fahrenheit. That is a good temperature. Here in the west we often are in over-heating our houses, and add to that the evil of a bad system of ventilation. It is no wonder in such an atmosphere that colds spread through a family, from the family to the school, or all over the town.

The treatment for a cold is simple enough. "Do to bed at once and stay there until better," is the advice of a well-known doctor. Drink

lots of water, and much drinks not too hot. Much current pills are all excellent. Drugs should only be taken under the doctor's advice. Hot foot-baths (about 110 degrees Fahrenheit) are effective, followed at once by bed. Do not try to "chuck a cough," rather try to expectorate, as this relieves the congestion. Rub the chest with warm camellia oil. Avoid all quick remedies and so-called cacti cures.

If there is high fever, call your doctor at once, you will lessen the danger of complications, the symptoms of which cannot be always recognized by the patient's friends. To "cuddle a cold" may cost you the loss of a few days' work or momentary, to neglect it may cost someone his life, for the chains of infection is never-ending.

Valuable health literature on the subject of colds is obtainable free of charge from the Red Cross Headquarters, 408 Gile Building, Edmonton, Alberta.

Wheat Pool Opening London Office

D. L. Smith, who was recently appointed manager of the London, England, office of Canadian Wheat Pool, will shortly arrive on his new duties in the old country where an office will be made to extend the pool's business. Mr. Smith will be accompanied by R. A. McPherson who will supervise the opening of the new agency.

Craigville News

Curling got under way on Monday evening with the first games in the President vs. Vice-President competition being played. The ice is in excellent condition and the ice maker and his helpers are deserving of great credit for the noble work done.

Miss Mildred Dewey was operated on in Hanson Municipal Hospital on Tuesday morning for appendicitis, and was reported to be doing excellently, and it is the wish of her many friends that she will make a good recovery.

Mrs. C. E. Stittman and her two daughters, Misses Mary and Beltr, left on Sunday night's train for the east, where they intend to visit for the next few months. During their absence Mr. and Mrs. Thos. Dewey and family are expecting Mrs. Stittman's home.

J. K. E. returned at the end of last week from Winnipeg, where he attended the annual meeting of the United Grain Growers. L. A. W. White went to Calgary on business on Monday, and returned home that evening.

What Fuel Will You Use This Winter?

A variety of fuels are now available for home heating purposes, and for winter season at hand many householders are faced with the problem of what fuel to use and how to get the best results in burning it.

With a view of making the average householdier in using certain fuels and mixtures to advantage, a pamphlet, entitled: "Instructions for householders in using certain fuels and mixtures to advantage," has been published by the Mines Branch, Department of Mines, Ottawa, with the approval of the Dominion Fuel Board. Tests on which the instructions are based were carried out in the Fuel Testing Laboratories of the Mines Branch, on the following fuels: American anthracite, Welsh and Scotch anthracite gas and by-product coals, low volatile semi-bituminous coal, bituminous coal, peat, Alberta domestic fuels, mixtures of bituminous coal and coke.

The basic principles that should be followed in handling and firing each of the fuels and mixtures tested are outlined in the pamphlet, and these directions should be found to give satisfactory results in both hot water furnaces and oil-fuel furnaces.

Copies of the pamphlet may be obtained upon application to the Director, Mines Branch, Department of Mines, Ottawa.

Provincial Seal Fair, to be held January 17-20

The Alberta Provincial Seal Fair will be held in Calgary from January 17 to 20, at the venue time as the U.F.A. annual convention, announced. Gold cross medalists W. J. Stetson. The first two days will be occupied by the judging of entries, and a number of meetings will be held during the last two days. The Alberta Seed Growers' Association will hold their annual meeting at the same time. Entries are expected at the time held from a number of exhibitors in the province who are showing at the forthcoming Chicago International Hay and Grain Show.

Be careful where you put your confidence and you won't lose it.

1928 RADIO MODELS

BY WESTINGHOUSE

Have These Notable Advantages and Improvements

A. C. Batteryless Sets:
Operate on either 25 or 60 cycle alternating current. This is a big advantage should you move where there is different A. C. supply.
Designed to use new Westinghouse A.C. Rectifiers UX-125 and UX-127 which operate on either 25 or 60 cycle "A.C." alternating current through a step-down transformer to the set. (These Rectifiers give the best and "A.C." sets which have been the chief disadvantage of many types of A.C. Batteryless sets in the past. The UX-125 Power Tube is employed for lead speaker operation.)

Battery Operated Sets:
Designed to operate with "A.C." Autotransformer. "B" Kilmister Units are included without requiring special neutralization.
Designed to use new Westinghouse "A.C." Rectifiers UX-125 and UX-127 which have been universally adopted by radio manufacturers in the past. Owners of previous Westinghouse models can use this improved tube by having their Westinghouse sets re-neutralized and installation of correct replacement at a cost of \$2.50 up, plus express charges.

Each Batteryless and Battery type set has the Radio Master. Portable model enables convenient transportation which adds greatly to the pleasure and enjoyment of the set. These are also standard radio-sets and are also standard radio-sets and are also standard radio-sets.

Single control action operation, of the dual type are used in all models but appearance and design. The Dual Control feature gives pleasure in both appearance and design. The Dual Control feature gives pleasure in both appearance and design. The Dual Control feature gives pleasure in both appearance and design.

Prices of the "A.C." Batteryless sets from \$22.50 to \$25.00 complete. Prices of the Battery Operated Sets from \$25.00 to \$28.00 without accessories.
